

Faith During Covid-19

Reading through the history of Faith Lutheran Church for the 150th anniversary celebration has sparked curiosity about what church members experienced and thought during crises in the past. Future members of Faith who look back at this time of pandemic may well wonder what life and faith was like for members of Faith who lived through it. We invite you to use this sheet to provide a personal account and witness for those future generations. Include your name, if you choose, return it to the church and it will be archived as a record for times to come.
